Murcia, Spain

Relevance:
Rebuild of los Nietos

Client / Operator:
Club Náutico Los Nietos

Timeline:
2011

Quality Control:
BMI ISO QA Manuel

Project Delivery:
Design/ Build

Moorage at Club Nautico Los Nietos was significantly improved thanks to a complete upgrade to the Port's floating piers. Bellingham Marine Spain led the renovation which included the 400ml of metal frame dock system Unideck®.

This complete upgrade has 4 lines of 100m of metal frame dock with a gangway.

The metal frame dock is anchored on chains that fix perfectly the 100m as one piece.

The Unideck® system consists of structures made of aluminum, corrosion resistant, covered with decking and optionally bonded together by silent armed blocks.

The profiles have a top guide rail and two side rails which allow a sliding mounting cleats mooring, anchoring chain plates and other accessory port.
